

CONTRACTOR PERFORMANCE EVALUATION

PROJECT ENGINEER: Kenneth Voronin

Date: 10/15/2009

CONTRACTOR: JJ White

DATE STARTED: 10/6/2009

DATE COMPLETED: 10/15/2009

JOB DESCRIPTION: JJ White's was the mechanical contractor on the capital project at the Marcus Hook facility for the installation of a thermal expansion pot on the plant's 3" carbon steel ethylene oxide supply line. A new 3" tee spool piece was fabricated and installed as part of the 3" line.

<u>DESCRIPTION</u>	<u>RATING CODE</u>
QUALITY OF WORK PERFORMED	A
MEETING SCHEDULED COMPLETION DATE	A
COOPERATION WITH PLANT PERSONNEL	A
ADHERENCE TO PLANT SAFETY PROCEDURES	A
COMPLIANCE WITH OSHA 1910.119, SECTION h	A
OVERALL PERFORMANCE	A

COMMENTS: No safety issues involving JJ White personnel were noted during their time on site. All JJ White technicians were observed to have carried out their duties in a safe and professional manner. John P. Murt was the lead man for JJ White. He was able to interpret the plans and directions given to him by Rhodia personnel. They then turned those directions into action items that he and his crew accomplished successfully.

RATING CODE: A - Excellent
B - Good
C - Satisfactory
D - Unacceptable (should attach formal letter with details of unacceptability).

Distribution: Project Engineer, Operations manager, Technical Manager, Vendor File, Project Race File
